

The 2013-2017 allocation period is in its last year, along with that has come several questions about water usage and penalties. The MRNRD Board of Directors has approved the next allocation period for 2018- 2022 and producers will have 60" allocation plus an allowable reserve of up to 12" (IF YOU HAVE IT AVAILABLE OR AS ADJUSTED FOR PENALTIES IMPOSED BY OVERUSE) from the 2013-2017 allocation period.

Should you pump more than your 2017 Hard Cap Allotment, the penalty will be:

2 inches for every inch over for the first 3" inches

And

3 inches for every inch over the 4th"

Also there will be penalties should you pump more than your 2013-2017 allocation allotment, penalties will be:

1 inch for every inch over the first 3 inches

And

2 inches for every inch over the 4th"

Despite the fact that you will not be allowed to pump more than the specified amount of water for 2017, YOU WILL NOT LOSE ANY OF THE OTHER WATER YOU HAVE FOR THE TOTAL ALLOCATION AND WILL BE ABLE TO CARRY OVER UP TO 12" if you have it.

2013 – 2017 Allocation Info and 2018 - 2022 Allocation Info available below as well as how to calculate your usage!!!! For more information please call the MRNRD office @ 308-367-4281!

Don't forget to use our Irrigation Calculator to help figure your usage!!!!
